

PRESS RELEASE

N. Bogdanos Marine Bureau and NOV Fiber Glass Systems organize a Technical Symposium on the applications and benefits of the Glass Reinforced Epoxy piping systems for Marine, Offshore and Industrial installations on **Thursday 16th May 2013, at 6pm at the Athenaeum InterContinental Hotel, Athens**. Distinguished speakers from the US-headquartered NOV/FGS Group will address all relevant issues and a Q&A session will follow the interactive event.

NOV Fiber Glass Systems (www.fgspipe.com), part of the NOV (National Oilwell Varco) Group USA, is the market leader in the manufacture and supply of Glass Reinforced Epoxy piping (GRE), known under the trade name of Bondstrand®, which Bogdanos Marine exclusively represents in Greece & Cyprus for over 20 years, with a vast installed base in industrial, marine and offshore sectors. NOV/ FGS is the ultimate alternative to steel with a wide range of solutions both for new constructions and retrofits, ensuring a totally corrosion-free service life of the piping network, for a variety of corrosive liquids.

N. Bogdanos Marine Bureau Ltd. (www.bogdanos-marine.gr) established in Piraeus in 1956 is the oldest firm of marine consultants, surveyors, valuers and appraisers in Greece. The company today also acts as agents in the areas of vessel dry-dockings and underwater ship-repairs globally, as well as eco-friendly marine paints & coatings and other major marine & industrial equipment like the NOV/FGS Group.
